

WHALE SUPPORT

One of Whale's primary objectives is to maximise operating performance by keeping downtime to an absolute minimum, leading to significantly reduced whole life costs. This is achieved by a service and parts operation that is the envy of the industry. In addition to extensive parts stock and availability, Whale offers routine and preventative maintenance packages.

WHALE QUALITY

Whale Tankers care about quality across all aspects of its business. Indeed it is a word that characterises the company. Whale is an ISO9001 registered company. The manufacturing of both Trailers and HGV'S has also been granted Conformity of Production by the VCA.

WHALE TRAINING

Central to Whale's success is not only the training of its workforce, but also the provision of recognised, accredited and non-accredited courses that have been structured to meet the changing needs of today's waste water and sewerage industries. The company is also respected for its onsite commissioning of all new vehicles for its customers.

WHALE ENVIRONMENT

Whale Tankers is a green canvas through and through, encompassing its products, production processes, staff training and its interaction with its environment. Always focusing its efforts on minimising its impact on the environment, Whale is synonymous with the 'Green' concept. Operating an environmental quality system accredited to ISO14001, Whale Tankers continues to embrace proven environmental initiatives, whilst being committed to delivering on its promises for decades to come. Whale was for example one of the first companies to embrace low carbon technologies. Occupying an industrial site nestled within a 160 acre green belt area, Whale takes its immediate environment extremely seriously and treats it with the utmost sensitivity, creating its own Whale forest through the ongoing planting of more than 24,000 indigenous trees. Whale Tankers - home to an idyllic environment, green products and processes, and living proof that nature and manufacturing can co-exist together in perfect harmony.

Whale Tankers manufacture a wide range of vehicles and provide many other services.

WHALE VAC

Reliability, Service, Value ... for Life

For customers wanting a lightweight high capacity semi trailer, purpose- designed to transport hazardous and non hazardous liquid waste you need look no further than WhaleVac. With a simple, reliable low maintenance design available in 5mm thick mild steel and 4mm stainless steel, we have developed a range that minimises vehicle weight whilst maximising payload. Designed to operate at 40/41 tonnes GWC and 44 tonnes GWC the WhaleVac is fitted with axles and suspension in tri-axle format and has full air suspension with air lift front axle. It also has 5 metre long aluminium hose storage racks fitted to each side with hose retaining straps.

Quality Assurance

All trailers are Type Approved in Accordance with Regulations identified in 2007/46/EC – Frame Work Directive. ANNEX IV, Part 1, O4. All designs are originated by qualified engineers using an advanced 3D CAD system.

Design

Tank design is optimised with the benefit of 45 years experience to give the lightest weight with the longest life. Compliance with all national and international standards as required. The WhaleVac tank is a parallel cylindrical barrel with torispherical ends shaped for maximum strength. Rear end fitted with 600mm man access for light weight.

Vacuum System

The system is based on a mistral 7 series exhauster with a diesel powered donkey engine. Fully self contained and interchangeable in an underslung 'pod'. Power pack contains all controls including a change over valve to allow for pressure discharge.

Finish

The whole vehicle is finished in our purpose built paint facility where special attention is paid to preparation. Any colour or livery can be applied either using our in-house vinyl printing and cutting system or conventional signwriting. Internal finishes can be applied to the tank either in-house or using specialist lining finishes.

WhaleVac Vacuum Circuit

Mistral 7 Vacuum System giving an output performance of 345cfm Free Air

Other Performance Levels Available

Range up to Mistral 1000 Engine or Hydraulic drive
